OBJECTIVE

The investment objective of the Trust is to achieve capital growth by investing in Europe.

STRATEGY

The Trust will seek to achieve its investment objective by investing at least 75% of its total assets directly and indirectly in equities and equity-related securities of smaller companies (i.e. bottom 30% of total market capitalization) incorporated in, or exercising the predominant part of their economic activity in Europe (ex UK) or quoted or traded on the stock exchanges in Europe (ex UK).

MARKET OPPORTUNITY

- Smaller companies tend to outperform larger companies and have higher growth rates over the long term.
- Smaller companies indices include a large number of diverse and idiosyncratic stock selection opportunities.

Key Risks:

- Regional Funds have a narrower focus than those which invest broadly across markets and are therefore considered to be more risky
- Emerging markets countries may have less developed regulation and face more political, economic or structural challenges than developed countries. This means your money is at greater risk
- The Fund can hold smaller company shares which can be more difficult to buy and sell as they may trade infrequently, in small volumes and their share prices may fluctuate more than those of larger companies
- Derivative instruments can make a profit or a loss and there is no guarantee that a financial derivative contract will achieve its intended outcome. The use of derivatives can increase the amount by which the Fund's value rises and falls and could expose the Fund to losses that are significantly greater than the cost of the derivative as a relatively small movement may have a larger impact on derivatives than the underlying assets
- Changes in exchange rates between the currency of the Fund and the currencies in which the assets of the Fund are valued can have the effect of increasing or decreasing the value of the Fund and any income generated

The Morningstar Rating™ for funds, or "star rating", is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The Morningstar Rating does not include any adjustment for sales loads. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods.

The Morningstar Analyst Rating™ is not a credit or risk rating. It is a subjective evaluation performed by Morningstar's manager research group, which consists of various Morningstar, Inc. subsidiaries ("Manager Research Group"). In the United States, that subsidiary is Morningstar Research Services LLC, which is registered with and governed by the U.S. Securities and Exchange Commission. The Manager Research Group evaluates funds based on five key pillars, which are process, performance, people, parent, and price. The Manager Research Group uses this five pillar evaluation to determine how they believe funds are likely to perform relative to a benchmark, or in the case of exchange-traded funds and index mutual funds, a relevant peer group, over the long term on a risk-adjusted basis. They consider quantitative and qualitative factors in their research, and the weight of each pillar may vary. The Analyst Rating scale is Gold, Silver, Bronze, Neutral, and Negative. A Morningstar Analyst Rating of Gold, Silver, or Bronze reflects the Manager Research Group's conviction in a fund's prospects for outperformance. Analyst Ratings ultimately reflect the Manager Research Group's overall assessment, are overseen by an Analyst Rating Committee, and are continuously monitored and reevaluated at least every 14 months.

For more detailed information about Morningstar's Analyst Rating, including its methodology, please go to global.morningstar.com/managerdisclosures/ The Morningstar Analyst Rating (i) should not be used as the sole basis in evaluating a fund, (ii) involves unknown risks and uncertainties which may cause Analyst expectations not to occur or to differ significantly from what they expected, and (iii) should not be considered an offer or solicitation to buy or sell the fund.

Barings Europe Select Trust class I GBP Inc share was rated against the following numbers of EAA Fund Europe ex-UK Small/Mid-Cap Equity investments over the following time periods: 109 investments in the last three years, 82 investments in the last five years, and 59 investments in the last ten years. **PAST PERFORMANCE IS NO GUARANTEE OF FUTURE RESULTS.**

Morningstar Rating is for the I share class only; other classes may have different performance characteristics.
